Altibase FAQ | Error Messages

ERR-01027 (4135) No more IPC channel

Overview

This document explains the cause of and action for the `ERR-01027 ( 4135) No more IPC channel` error, which occurs when no IPC channels are available for a new connection to the Altibase server.

Version

All versions of Altibase

Symptom

When a client attempts to connect to the Altibase server using IPC, the connection fails with the following error:

```
ERR-01027 ( 4135) No more IPC channel
```

Cause

The number of IPC channels currently in use has reached the maximum number configured by the `IPC_CHANNEL_COUNT` property. As a result, Altibase cannot allocate an additional IPC channel for a new connection.

Action

Increase the value of `IPC_CHANNEL_COUNT`, and then restart the Altibase server.
